Argomento	Talking about technicalities - 2nd part - Issues in the past

TALKING ABOUT TECHNICALITIES - 2nd ATTEMPT

1) YOU'LL BE DIVIDED IN COUPLES
2) YOU'LL BE GIVEN ONE OF THE FOLLOWING :

1. **Google Drive (early 2012-2015)**: ANDREA S, SIMONE, CHRISTIAN
2. **OneDrive (pre-2015)**: LORENZO A, EDOARDO
3. **MegaUpload Cloud (pre-2012):** ANDREA c, mario
4. **iCloud (2011 launch)** : CHRISTOPHER, LORENZO S
5. **IBM SmartCloud Notes**: GABRIELE, JACOPO
6. **Symantec Cloud Services**: VITO, BARBARA
7. **HP Cloud**: SALVATORE, ALESSANDRO P
8. **Nokia Cloud Services (early 2010s)**: RITA, ANIS
9. **Yahoo Cloud Storage**: LUCA, KOUANKEU
10. **SugarSync (early 2010s):** KATHERINNE, LUCIANO
11. **AT&T Synaptic Storage**: YASSINE, EMANUELE
12. **Rackspace Cloud (pre-2015)**: LORIS, FRANCESCO

13. **Adobe Buzzword (cloud office suite)**
14. **Microsoft SkyDrive (pre-2013)**
15. **Dell Cloud**

3) LOOK UP THE TOPIC. Here is a short list of questions that may help your investigation (feel free to use it or not):

1. **Purpose and Origin**

- What was the intended purpose of this cloud system?
- Who were the target users or organizations?
- What problem or need was it supposed to solve?

2. **Design and Implementation**

- How was the system designed (architecture, features, storage type)?
- Were there technical limitations or design flaws that contributed to failure?
- Did it have adequate security, reliability, and scalability from the start?

3. **Performance and User Experience**

- Did the system suffer from frequent downtime, slow performance, or sync errors?
- Were users satisfied with the interface and usability?
- How did customers respond to bugs or crashes?

4. **Market and Competition**

- How did it compare to competitors at the time?
- Were there better alternatives available that overshadowed it?
- Did pricing or business strategy play a role in its failure?

5. **Consequences and Lessons Learned**

- What were the main reasons the cloud system failed or lost popularity?
- Were there security breaches or data losses?
- Did the company try to fix or improve the system? Was it successful?
- What can current and future cloud service developers learn from this failure?
